

**AI-VANTAGE TRACK**

# AI-Vantage for Education

---

**KEY TAKEAWAYS**

- 1** Genuinely helps: personalized practice problems, explaining concepts multiple ways, faster instructor prep.
- 2** Quietly undermines learning: letting a student get a finished answer before struggling with the problem.
- 3** TEKHub rule: AI can check your work or explain a concept, but it doesn't get to do the work for you.
- 4** How TEKHub instructors use it: exercise variation generation + first-pass grading, freeing time for real feedback.
- 5** Next step: bring a specific classroom/study problem to the next AI-Vantage session.
